

Module 3 Quiz

7/7 points (100%)

Quiz, 7 questions

✓ **Congratulations! You passed!**

[Next Item](#)1 / 1
points

1.

You are given a dataset on movie reviews with a 1,000 labeled reviews. The labels are one of five movie genres: Action, Comedy, Drama, Horror, and Sci-Fi. The dataset has roughly 200 movie reviews for each movie genre.

Your first task is to learn a supervised classifier to identify just the reviews for Comedy movies from the dataset. Such a task is:

1 / 1
points

2.

The dataset available for the first task is:

1 / 1
points

3.

Suppose you decide to train a support vector machine classifier for this first task. The methodology you will employ will be a:

1 / 1
points

4.

You are given a dataset on movie reviews with a 1,000 labeled reviews.

The labels are one of five movie genres: Action, Comedy, Drama, Horror, and Sci-Fi. The dataset has roughly 200 movie reviews for each movie genre.

Module 3 Quiz

Quiz, 7 questions

7/7 points (100%)

Your second task is to learn to identify all five movie genres. Such a task is:

1 / 1
points

5.

The dataset available for the second task is:

1 / 1
points

6.

Suppose you decide to train a support vector machine classifier for the second task. The methodology you will employ will be a:

1 / 1
points

7.

How many binary classifiers will you need to train for the second task using the one-vs-one classification approach?
